# Why choose COROHAWK compared with other systems?

1. **COROHAWK manufactures, installs and services all systems with their friendly and qualified team. Corohawk provides a **Two Year Warranty on your feed System, and Twelve Months on electrical.**** Break downs are actioned straight away.
2. **CHORE-TIME Silos.** Corohawk is the New Zealand distributor of Chore-Time Silos. The range is wide and the engineering is up to ISO standard. Safety cages are a standard feature for ladders exceeding 6m in height. Chore-Time's silos continue to feature the strength, quality, design and warranty backing the result in a product you can count on for years of reliable service.
3. **Our stainless tray is 1.2mm thick and is 100% 304 grade STAINLESS.** The fold design we created, forms a very strong tray with a safety edge along the front. All seams are sealed, and welded to give strength, hygiene and durability.
4. **Our dispensers are New Zealand made and the strongest on the market.** They are rotationally moulded and in 2011 were redesigned for increased durability, UV protection and enlarged to increase the volume for better functionality.
5. **We are the first to use and market the "Y" end.** The Y end halves the amount of dispensers. If you have little room behind the breast rail for the cows head, the Y puts the dispenser between two cows to give more room at "eat" point.
6. **We use 32mm pipe and box section.** The 32mm pipe is curved for the main support and welded to the bottom of the breast post to allow the breast rail to be moved.
7. **Our gearbox** is rated for 5hp. We use a 1hp - 3ph electric motor to drive augers.

## THE ROUND SHELTER RANGE
